

## Notes from the MSGSA Meeting on October 5, 2007

This meeting began with a discussion of some points from the most recent GSA meeting. At the MSGSA meeting last month we brought up the issue of having a Windows machine available in our department that the graduate students could use. This issue was looked into and we discussed it further. Next we finalized the plans for a social gathering involving the graduate students in the Math/Stat department. We agreed on apple picking and a trip to the symphony as two social events for this semester.
